

THE CHINOOK ADVANCE

Vol. 19

Chinook, Alberta, Thursday, September 13, 1934

No. 22

Rogers Syrup	5 lbs	39c
2 Pkg Sunlight Soap		39c
4 lbs Plum Jam		45c
5 " Rice (good)		27c
3 Pkg Cornflakes		23c

We have just received a shipment of G. W. C. Shirts, Windbreakers, Overalls Sweaters etc.

Acadia Produce Company

Onions per lb	.4c	Apples 6 lbs	.25
New Cabbage lb	.4c	Tomatoes 2 cans	.28c
New Carrots lb	.4c	Round Steak per lb	.10c
Crabapples 6 lbs	.25c	T Bone, Sirloin roast lb	.11c

We have a supply of fresh Bacon, Bologna and Cottage Roll. Let us fill your harvest needs.

CHINOOK MEAT MARKET

Local Newslets

The Misses Hazel and Ella Broston, who have spent the Summer at Clear Water Lake Sask., returned on Tuesday.

A blanket of snow covered this district on Thursday morning but quickly disappeared.

Mr Harry Johnston left on Monday for Effros, Sask.

Would the party who took by mistake the full can of R. King Powder in place of the empty can from the fair building kind for turn it. Can be left at the the Advance office

Miss Duff began her duties as teacher at the Myrtle school last week.

Mrs. Fowler of Calgary, who has been visiting at the home of her daughter, Mrs. Rideout for about two months, returned to her home on Tuesday.

Miss Mabel Gilchristson who has been with friends for the past two weeks at Hanna, returned on Sunday.

Mrs. L. Ullman, of Lousana Mrs. J. Ferguson of Trochu and Mrs. J. Wright Lawrence, of Red Deer, were guests of Mrs. Chapman over Conference time

The Dobson school which has been closed last year was reopened on Sept 4th, with Mr. Mudrick McPherson as teacher.

Miss Estelle McKinnon, daughter of N. D. McKinnon, Colborne, left for Calgary last week where she will attend Normal School.

Mr. Gus of Munson, spent the week end visiting with friends here

Mr. and Mrs. Bjork and family of Atlee attended the School Fair here on Tuesday.

Chinook was honored by having had a short visit on Tuesday from Mr. H. A. Craig, Dept. Minister of Agriculture, and Mr. S. G. Carlyle, Livestock Commissioner for Alberta. They were on a trip passing through inspecting the feed situation for stock. They spent a short time in the Agricultural Hall, where the School Fair exhibits were.

They complemented the Chinook and District School Fair on their good vegetables, making special mention of the beets and potatoes, stating they were larger and of better quality than any they had seen west of Edmonton.

W. I. District Convention

The Annual Constituency Conference of Acadia West Women's Institute was held in the E. K. Hall, Youngstown, on Sept. 5th. Upwards of 60 ladies attended, which included members from Cereal, Chinook and Youngstown. Mrs. J. W. Lawrence of Red Deer, Constituency Convener, presided. The address of welcome was given by Mrs. Aggett of Youngstown, and replied to by Mrs. N. Marcy, Pres. of the Chinook W. I.

Report of Cereal Branch was given by Mrs. Lilley; Chinook by Mrs. Wilson and Youngstown by Mrs. Scofield.

Reports of Standing committees chairmen were given. Legislation—Mrs. Clapperton; League of Nations—Mrs. Hughes; Home Economics—Mrs. Marcy; Education—Mrs. Shier; Better Schools—Mrs. Shier; Canadian Industries—Mrs. Hille; Agriculture—Mrs. Hille; Child Welfare—Mrs. McCulloch.

Interesting addresses were given by Mrs. Ullman, our District Director and Mrs. J. Ferguson, our Prov. Pres. Before commencing her address, Mrs. Ferguson asked all to stand in silence for one-half minute a tribute to memory of Mrs. Esler, an outstanding W. I. worker and former constituency convener.

Piano selections were given by Mrs. Turple, Misses Monah McCulloch and Marguerite Coad. Solo and encore by Mrs. Williams and pianologue by Mrs. Rideout.

Mrs. W. Wilson was elected Constituency Convener, and the following chairmen of Standing Committees were elected:

Child Welfare—Mrs. McCulloch, Scottsbluff; Education and Better Schools—Mrs. Turple, Chinook; Legislation—Mrs. S. Tilley, Cereal.

Home Economics—Mrs. N. F. Marcy (re-elected); Agriculture—Mrs. Hille, Cereal.

Canadian Industries—Mrs. W. J. Shier, Chinook; League of Nations—Mrs. Lowmyer, Cereal.

A vote of thanks was given the Youngstown ladies for their entertainment, also Mrs. Lawrence for her faithful work during her term of office. Many thanks are due Mrs. Lawrence efforts made to come so far to attend the Conference. The Youngstown ladies served a delicious lunch at the close.

FOOD IDEAS

Add two cups of finely cut celery to your stuffings for meats.

Drain the juice from a can of pineapple and dry the slices on a soft cloth. Fry to a delicate brown in butter.

For a novelty, serve your cabbage salad in a cabbage nest. Carefully cut the inside from a cabbage head, leaving the outer leaves to form a nest. Chop the portion you have removed and season with chopped peppers and salad dressing. Let it sit in a cold place for several hours, to blend the flavors, then return to the nest and serve.

Alberta Ready To Start on Project For South Relief

Alberta Ready To Start on Projects For South Relief

CATTLE DISPOSAL ALSO CONSIDERED

Hon. G. Hoadley Says Details Of Schemes Still Uncertain

EDMONTON, Sept. 5, 1934.—Decision to initiate two important projects for assistance of settlers in the drouth areas of the Province has been made by the provincial government this week, announces Hon. Geo. Hoadley, acting premier.

One of these projects is the initiation of a program of works in the municipalities and improvement districts in the drouth areas to be financed by the provincial government through the municipal authority, in such a manner as to give the greatest benefit to the farmers in these districts. This program will include not only the construction of roads throughout the municipal districts concerned, but also the construction of dams for the conservation of water for stock in the area most seriously affected by drouth conditions.

The other project is in connection with the disposal of cattle in the hands of settlers in the drouth districts. From information in hands of the government, there are some 20,000 or 25,000 head of cattle to be disposed of. Some of these have already been sold at unfairly low prices. The government hopes to initiate arrangements whereby some of these cattle will be disposed of, the low grade stock going to packers for processing, while it is hoped to be able to sell the more desirable stock to those who have feed in the northern districts.

Details for both the above projects are still to be worked out, but the general policies have been decided upon.

Mr. Hoadley, in announcing these plans, made it plain that, while decisions affecting other parts of the province had been arrived at during his Ottawa negotiations, also that Ottawa's authority had been obtained to proceed with the usual arrangements again this year under the free freight policy for movement of settlers, movement of cattle out or movement of feed into the dry areas, the other problems of the drouth areas had remained undecided by the Ottawa authorities, for the reason that data was still being awaited from the other provinces.

Mrs. Homer Butts was the guest of honor at a little W. I. party at Mrs. R. Stewart's home last Friday afternoon. The hostesses for the occasion were Mrs. Marcy, Mrs. Bennett, Mrs. Rideout and Mrs. Chapman.

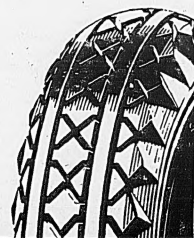

Mrs. Butts leaves shortly to make her home in Hanna, and as a slight token of her services in the Institute the ladies presented her with a dainty organ-dy scarf, embroidered in colors. The best wishes of all are extended to Mrs. Butts and family.

Uniform Price System Advocated

Introduction of a uniform price system throughout Canada as a means of distributing whatever benefits result from protective tariffs and of equalizing production costs, was advocated by J. D. McKenna, St. John, N.B. publisher, in a recent submission to the royal commission investigating Nova Scotia's economic situation.

Urging equalization of wholesale prices of all protected goods manufactured in this country, Mr. McKenna contended that Montreal and Toronto virtually monopolized whatever benefits resulted from protective tariffs. Eighty-five per cent. of manufactured goods came out of Ontario and Quebec, he said, and because costs of the finished articles included all the taxes imposed by governments, provincial and federal, it followed that people of other provinces purchasing those goods, had to "pay not only their own taxes but theirs as well—and that comes to a pile of money."

His scheme to equalize costs and to standardize prices throughout the country, involves absorption by manufacturers of freight charges, a process with which many in Western Canada would be prone to agree. This, Mr. McKenna claimed, would permit manufacturers to place their products on the market at a uniform price—the same in Halifax, Regina and Vancouver as in Toronto and Montreal. Press dispatches note that at the close of his presentation, Mr. McKenna was complimented by Prof. John Harry Jones, of Leeds University, England, who, noted as an economist, is chairman of the commission.

The contentions and proposals of Mr. McKenna are by no means new to Western Canada. Least of all are they new to a certain small group of Saskatchewan economic students which, for two years or more, has been conducting inquiries along similar lines, with a view eventually of sponsoring a plan which might be adopted as a "Western Policy". This group has concentrated its attention upon the price structure, seeking to determine what inequities exist with it, noting more particularly the effects upon it and upon the purchasing power of the prairie provinces of freight, tariff and taxation costs.

The former favorable disparity in wage and salary scales as between Western and Eastern Canada having disappeared under stress of economic conditions, or being noticeable only in reverse, the Saskatchewan group has been seeking something to compensate the loss. Though prices of manufactured goods had fallen, the drop was commensurate with the drop in prices of farm products, and seemed to be determined largely by the reduced purchasing power of consumers in the West. Somewhere within this price structure, it was felt, lay certain factors which, if equalized or removed, would effect much-needed adjustments. Hence came the attack upon prices.

The Saskatchewan group has laid stress on the fact that, while freights and tariffs have increased farmers' production costs, they have received no compensation from manufacturers of consumers' goods, nor have the advantages accruing to the industrialized areas been distributed as, it was thought, they should be. From this it was argued that, as consumers, prairie farmers were encouraging a system which tended to centralize industry in the Toronto and Montreal areas, which areas derived direct benefits from local taxes payable by the industries and from circulation of the payrolls of such industries. This system, it was contended, placed the West under toll both at home and the East.

It was felt, therefore, that, inasmuch as these advantages were accorded the manufacturing areas of the East, there should be some compensatory factor, some method of distributing benefits, to all parts of Canada in the price structure. That is to say, while goods might cost a little more in the area of their manufacture, they would cost a little less in the area of their consumption. And inasmuch as the principle already is applied in the case of nationally-priced products, the proposition at first sight appears fair and just. The West will watch eastern reactions to the proposal made by Mr. McKenna, with considerable interest.

Border Cuts Off Hospital

Free State Board Has To Cross Line To Inspect It

Derry Port sanitary board has just held a remarkable meeting, the members leaving Northern Ireland to go into the Free State to deal with the business for which the meeting was summoned.

The board crossed the border in taxis to inspect its hospital at Ballyrattan, near Moville, in County Donegal, a hospital which has never had a patient since its opening thirteen years ago. It was built to deal with cases of infectious disease on vessels coming to Derry, but before its completion, the border had been created, with the result that the board was left on one side of the border and the hospital on the other.

No solution of the situation has ever been devised and the board decided to effect repairs to the institution, the chairman remarking that "the present state of affairs cannot go on forever."

South Africa Satisfied

Secession of South Africa from the Empire is as "dead as a doornail," according to General Smuts. Yet 24 years ago says the Ottawa Journal, General Smuts was riding the velvet warning on the Empire. History tells of little more splendid than this conciliation between Briton and Boer.

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end. Allow the prodigious diarrhoea, the vomiting and purging to continue, for a day or two, and you may become weak and prostrated.

Just as soon as you feel any looseness of the bowels go at once to your drugstore and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this unnatural action before the weakening looseness can get started.

Don't experiment. Get "Dr. Fowler's". It has been on the market for 88 years.

Not Very Profitable

Abraham Lincoln, Made Very Little From Law Practice

When Abraham Lincoln was elected president of the United States, his bank balance aggregated \$601.44. The original ledger showing his account now is on display in the Springfield Marine bank at Springfield, Illinois, where Lincoln was a depositor from March 1, 1853, until his death. His account after his death was continued by his administrator, Judge David Davis, of Bloomington, Ill., being finally closed on May 22, 1867.

The ledger in which his account appears is displayed in a glass and wrought-iron show case. The ledger is turned to a page on which is written in fine script the name "A. Lincoln" and the entries on the page bear out the certainty that his income from the practice of law was meagre at times.

COULD NOT SEW A BUTTON ON

Her Hands Were Helpless With Rheumatism

At one time she thought she would lose the use of her right hand. But "a blessing"—in the form of Kruschen Salts—put her right again.

"I was sure in a bad state," she writes. "In fact, I could not do my housework, I was so bad with rheumatism in my arms and hands. I could not sleep at night, and I thought I would lose the use of my right hand. I could not hold anything, nor could I sew a button on. My arm would go dead. I was advised to try Kruschen, and inside of three weeks I found such a change. I have kept on taking it, and now I sleep all night—thanks to Kruschen's help and relief." (Mrs.) J. H.

Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals, which are responsible for rheumatic agony. Other ingredients of these salts assist Nature to expel these dissolved crystals through the natural channel.

Wheat Situation Hopeful

Supply For 1934-35 More Closely Related To Probable Demand

The crop year 1934-35 is commencing with the general wheat situation not without its hopeful aspects, the Dominion bureau of statistics states. The supply of wheat available for the present cereal year has been greatly reduced by virtue of a second successive crop disaster in the United States, the certainty of a low yield in Canada, a sharp reduction in production in many European countries and the prospects of a small crop in Australia. These developments combine to produce a situation where the available supply of wheat is more closely related to probable demand than at any time in recent years, the bureau adds.

According to the United States department of agriculture, production of corn, wheat, oats, barley, rye and flaxseed are expected to be the smallest in 30 years.

Value Of The League

Exerts An Immense Force In The Prevention Of War

There is probably not a single country in Europe where the common people would blindly follow its leaders into war, if called upon to do so. All the nations of the world have in fact formally renounced war as an instrument of national policy; and the machinery of the League of Nations exists for its prevention. It is quite certain that, if war were inequity threatened, or were actually to break out in one quarter, resort would be made to the League, whose power of collective action, even if never yet fully utilized, is potentially immense. Its mere existence has undoubtedly acted as a deterrent at least upon the lesser nations and upon those which are not removed by oceanic distances from Geneva.—London Times.

Experimenting With Dry Ice

Air Cooled Planes Would Facilitate Travel In India

A transportation company in India is experimenting with dry ice, or cold carbon dioxide, as an agent for cooling aeroplanes. If satisfactory results are obtained, planes travelling across that country will be air cooled in future. Should experiments prove successful travel would be facilitated between Calcutta and Bombay, where summer temperatures of 115 degrees are considered normal and 130 degrees is sometimes exceeded.

Doorkeeper—Say, come back. Dogs are not allowed in here.

Visitor—That's not my dog.

Doorkeeper—Not your dog? Why, he's following you.

Visitor—Well, so are you.

A Wonderful Operation

Severed Eye Muscle Sewed And Woman's Sight Restored

An operation—one of the most delicate in eye surgery—has restored sight to a Memphis woman.

Platinum needles, electrically heated, punctured the eye 20 times in the course of the skilful surgery which regained for Mrs. Westwood Sayre 75 per cent. normal vision.

She lost the sight of one eye in June as she returned to her home from her flower garden. The other eye was not affected. A noted Memphis eye specialist said it was retinal detachment.

Severing a muscle he turned the eyeball inward. Foreign fluid had accumulated behind the retina causing it to bulge toward the centre of the eye. The retina is the curtain on the back of the inside of the eye on which images are focused and nerve sensations are transmitted to the brain. Blindness results if the retina is disturbed.

On the outside and back of the eyeball is a fibro-muscular covering which controls the movements of the eye and keeps the eyeball in shape.

From the outer edge of the fibro-muscular coating to the area under the bulging retina was a distance of one-eighth inch. A tiny fraction could be pierced, endangering both sight and loss of vitreous, the jelly-like substance that keeps the eye round.

Twenty platinum needles, each one-eighth of an inch long, each with a silk thread in one end, were placed nearby.

Clamping the first with an instrument which brought electricity to the needle until it was hot, the surgeon inserted the fiery point into the small area.

Twenty times the eyeball was pierced. Then slowly he grasped the thread and pulled out each needle. The severed eye muscle was sewed.

For two weeks the patient lived in total darkness, her head braced to prevent movement which might break tiny connections where the needles had seared through the eyeball, allowing one-half teaspoon of fluid to drain off and causing the retina to be gripped when it resumed its normal position.

The retina slowly dropped back into position. The eye healed. Bandages were removed. Light filtered into the retina. Objects became distinct.

Interesting Old Clock

Timepiece Of Catherine The Great To Be Repaired

A 17th Century clock, made by James Keeks, an English craftsman, and presented to Catherine the Great by her favorite, Marshall Potemkin, is to be restored, says a Leningrad magazine. The clock, which is of great artistic value, has not been in working order since 1915. When it is in working order, at noon every day the face of a peacock on the clock stands up and spreads its tail, which is made of gold; a cock, four or five times larger than life-size, starts crowing; and an owl, sitting on a branch above, rings a number of small bells.

Faster Planes Needed

French Air Staff Says Paris Would Be Helpless From Invasion

An invading air fleet will wipe Paris completely off the map unless France gets faster fighting planes, the French air staff believes.

Officials said the four days' aerial manoeuvres, recently held, showed conclusively that the capital cannot, with present effectiveness, be defended against air raiders, and emphasized sharply the urgent need for speedier aircraft.

A force of rebuilt pursuit planes failed to match the speed of heavily loaded bombers, comprising the "attacking fleet," the average speed of which was 140 miles an hour.

Jane—"My Scotch boy friend sent me his picture yesterday."

John—"How does he look?"

Jane—"I don't know yet. I haven't had it developed."

Many new commercial ships are being put into service in Greece.

BABY SCALDED!

Quick! Get the MECCA OINTMENT

Stop the pain and agony of a scald or burn with Mecca Ointment at once. Prevents infection, soothes, relieves, and promotes rapid healing. Keep a supply of Mecca Ointment in your home to meet all emergencies. Mecca Ointment is the only ointment applied to burns and scalds.

Mecca Ointment is sold by all Druggists—25c, 50c (tube), 50c and \$1.00.

W. N. U. 2063

Plug tobacco goes farther, because it lasts longer in your pipe. It's fresher, too, because the big plug doesn't dry out and you cut it coarse or flaky, to suit yourself.

PLUG SMOKING TOBACCO

Ontario Municipal Debt

Stated Debt Is Largest Of Any Province In Canada

Thomas Bradshaw, president of the North American Life Assurance Company, told the Ontario Municipal Association Ontario's municipal debt in default is the largest of any province in Canada.

Forty municipalities in Ontario, Mr. Bradshaw said, are in default to the extent of \$96,640,819 while the nearest approach to that figure is found in Quebec where the defaulting debt is \$15,000,000.

"No section of Canada, up to four years ago, has a finer reputation for municipal credit than the province of Ontario," he said. "To-day no section in Canada has a more serious municipal problem on its doorsteps than Ontario."

Moose Is Fast Runner

Proved It By Travelling 35 Miles An Hour

How fast is a moose? Ask Charles Mumford of Yarmouth, Nova Scotia. He'll say 35 miles an hour.

While Mumford was motoring home to Yarmouth a young bull moose in the road became frightened by the headlights and started running ahead of the car, maintaining his distance for a time while the machine travelled 35 miles an hour. Coming to a rise, the moose slowed to a 20-mile rate, leaped from the road and became tangled in a barbed wire fence. Mumford and others from the car were able to help the animal escape by shaking the fence.

Switzerland Heads List

Leads All Countries In Annual Consumption Of Milk

Statistics released by the Department of Agriculture show that Switzerland leads all other countries of the world in the annual consumption of milk, with 280 quarts per person.

Second place for this distinction is shared by United States and Germany, each of which boasts of 220 quarts per person. Canada ranks next with 200 quarts.

The figures on other large milk-drinking nations also computed annually and per person, are as follows: Great Britain, 120 quarts; France, 100 quarts; and Chile, 30 quarts.

Evidently He Knew

"Sambo," said the magistrate reproachfully to the negro before him, "I cannot conceive of a meaner, more cowardly act than yours of deserting your wife. Do you realize you are a deserter?"

"If you knowed dat lady as I does," replied Sambo, "you wouldn't sho' call me a deserter. Ah is a refugee—dat's what Ah is."

Applies To Advertising

If you had a whole bushel of chain links, it would not put a load. Put them together in a continuous chain and you have a strong and powerful thing with which to pull a load. So it is with advertising. Link your ads together, run them in a continuous string, week after week and you will produce results.

There are 1,225,700 miles of motoring roads in Europe and the British Isles.

It Could Be Done

Midland Gardener Used Only Waste Water For Plants

At the Midland Bank Horticultural Society's show it was remarked that the winner of seven prizes exhibited blooms watered entirely with wastewater, bath-water, basin-water; at any rate not fresh tap water, of which he proudly boasted that he had not used a drop in his garden during these months of drought.

It can be done. Therefore it ought to be done—as King Edward was fond of remarking mainly of things that were not done in his time. Do not ask us, please, how to get or convey bath water. Either find out, or don't use any water. A moral maxim for horticulturists.—London Daily Mirror.

Super-Race For Alberta

Development of a superior race of people such as has never been known in the world before was pictured as the future of Alberta through the combining of the province's wealth of natural resources and the ideals of the cosmopolitan population which live within its boundaries, by W. R. Howson, M.P.P., provincial Liberal leader, in an address given at Edmonton.

The United States ships quite a lot of shoe blacking to Africa. The natives probably use it for cold cream.

King George V. once paid \$8,000 for a rare stamp.

**IT'S LIVER THAT MAKES
YOU FEEL SO WRETCHED**

Wake up your Liver
—No Calomel necessary

For you to feel healthy and happy, your
liver must pour two pounds of liquid bile
into your bowels every day. Without that bile,
trouble starts. Poor digestion. Slow elimination.
Poison in the body. Greasy stools. Headaches.
How can you expect to clear up a situation
like this completely with mere home-moving
elixir, oil, mineral water, laxative candy or
clawing gum, or roughage? They don't wake
up your liver.
You need Carter's Little Liver Pills. Purely
vegetable. Safe. Quick and sure results. Ask
for them by name. Bitter-sweet taste. 25¢ a
dozen.

OCCASIONAL WIFE

By
EDNA ROBB WEISTER
Author of "Joretta", "Lipstick
Girl" Etc.

CHAPTER LX

A peremptory summons from Mr.
Hoyt on the day after Gus Matson's
visit, took Camilla to his office in a
state of trepidation. Had something
unusual happened? Was he angry
with her for her presumption and
deception? Had his pleasant atti-
tude at the broadcasting station been
only a masked act, for the sake of
his pride? It would be like him, per-
haps.

She approached the inner office al-
most with a feeling that the man
whom she was about to meet was a
stranger to her. But his greeting was
cordial enough—even affectionate.
Her fears vanished.

"I've been wanting to talk to you
my dear. You gave me the surprise
of my life the other day."

"Was it very wrong of me to de-
ceive you, dad?" she appealed wist-
fully.

His eyes twinkled as she never had
seen them before. "I'm mighty glad
you did. You proved to me what I
always suspected that you could do.
Even when your mother opposed
your ambition to take up commercial
art, I held a secret conviction that
you could make good. With your
determination, I could see that all
encouragement from me would be
superfluous, and only antagonize
your mother more."

He exchanged with her that look which she re-
membered so well from her child-
hood, a glance of understanding
which made words useless.

"Nothing could have pleased me
more than the way you have de-
veloped. I will admit that I never
should have dreamed of placing my
business promotion into your inex-
perienced hands, much as I believed
in you. So I engaged efficiency ex-
perts and paid a large fee to an ad-
vertising agency to handle the cam-
paign. And, after all, it fell right
into your inexperienced hands, and
you pulled us to victory. It only
goes to show that the wisest of us
haven't so much judgment, after
all, as we are. Well—that is just a
little of life's irony."

"It would be worse than irony if
I hadn't made good," she reminded
him with a timid smile.

"But you did!" he dismissed the
matter with a wave of his hand, and
demanded abruptly, "But what about
Peter? Are you going to let your
marriage fail, now that you have
succeeded in your career?"

"Oh, no!" Camilla denied. "You
know why I did not go abroad with
Peter. We are living according to our
original contract, of course."

"What good will your contract be
a year from now?"

"Why—Peter loves me, dad!"

"I don't doubt it. I know he does.
But when people love each other and
are married, they should be together;
at least, for most of the time I tell
you, Camilla, I feel it my duty to
advise you from a man's standpoint.
Your place is with Peter in Paris,
or wherever he is."

"But he can't take care of me and
he won't accept my help. He is ter-
ribly proud."

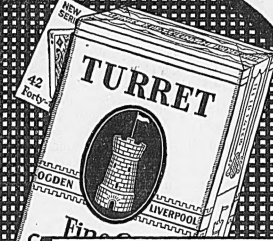

"Of course. But what about Avis
Worth?" he released another bomb.
"Do you know that she is on the
same boat with Peter?"

"Yes, but—"

"That is no coincidence," he inter-
rupted, sternly. "Camilla, I may as
well confess that I've kept a pretty
close watch over your private affairs
since you left us. Your happiness is
my deepest concern. I did not like
your marriage plans when I first
learned about them, and this separa-
tion has made them preposterous. I
tell you I won't stand by and see
your life ruined. It will be, if you
lose Peter. I know what he means
to you—you may not think so," his
voice lowered and he seemed to be
projected for a moment into a dis-
tant past, "but I, too, know what love
can mean. But you will lose Peter,
if you permit this thing to go on—
at least, you will lose the Peter and
the love with which you began so
confidently."

"Oh, I do wish so much to be with
Peter," she confessed. "But he won't
have me, under the circumstances."
"Listen to me, my dear. If neces-
sary, there always could be someone
found to fill your place in your work,
but not in Peter's life. And that is
the matter I find someone to take
over your radio programs, even some-
one whose voice so resembles yours

that the public never would recog-
nize a substitute, if that is more ad-
visable. You have started the pro-
grams personally. Now, there is no
reason why you can't pack up the
rest of your work and take it right
over to Paris with you. That will
solve the problem of present exist-
ence. You can provide for yourself
very well, but I also make the re-
quirement that you and Peter are
to take a comfortable studio, large
enough to accommodate the work
and privacy and temperaments of
two geniuses," he smiled slyly, "and
live together. You will discover what
happiness is, then."

"But Peter won't live that way
when I have the advantage over him.
He hasn't even a start in Paris yet."
"As for Peter, I have managed
some other things which may mollify
his wounded pride," Hoyt continued
placidly. "I have arranged for a
large replica of his exhibit group to
be given a prominent place in this
city, but he never will know who
promoted the movement. You will
guard the secret for his sake. It is
not philanthropy—I was only given
the hand of destiny for starting the
movement."

"As for your future, my dear child,
you are my sole heir to the fortune
which you have salvaged. However,
that is not a new idea. I always ex-
pected to bequeath the bulk of my
estate to you, but I purposely in-
sisted when your mother took you
that I should not acknowledge you
as an heir, so that you would be
forced to prove yourself. I had con-
fidence that you would, which in-
creased as you grew older. That you
accomplished it through your own
efforts to reclaim my business, is an-
other one of those inexplicable
twists of fate. But I advise you," he
warned her with twinkling eyes,
"that you had better not tell your
proud Peter you are an heiress. Let
him be surprised when the time
comes, and he has made good for
himself."

The stars were falling, unheeded,
down Camilla's face while he talked;
and when she left, a more perfect
bond of paternal affection and
dauntless respect was not to be
found anywhere. Camilla Hoyt had
entered into her rightful heritage,
by character and effort.

The pandemonium of a steamer
landing at Cherbourg was in full
swing. Passengers who had been
waiting with varying degrees of
waning patience to land, were re-
leased in a single file down the gang-
plank. Peter followed Avis, who
turned to him often with a smile or
a word of confidence.

"Have you got everything?" she
asked him, with the air of an aban-
doned traveler prompting her charge.

"Guess so," his reply was laconic.
But he felt as if he had left some-

WHEN YOUR DAUGHTER COMES TO WOMANHOOD

Most girls in their teens need
a tonic and regulator. Give your
daughter Lydia E. Pinkham's Vege-
table Compound for the next few
months. Teach her how to guard
her health at this

Sold at all good drug stores.

**Lydia E. Pinkham's
Vegetable Compound**

thing very valuable aboard the
steamship, something which he could
not go back to recover. It was not
there. It had escaped somewhere into
the void of lost ideals and illusions.
He felt older, hurt, broken; but he
faced the new future resolutely.

Following Avis with eyes that were
almost unseeing he jostled against
her as she stopped abruptly in front
of him in her court. He looked up
inquiringly, to follow her eyes which
were riveted upon something she saw
on the pier. His own eyes stared as
if he were seeing a mirage.

Surely, it could not be true. That
couldn't be Camilla standing down
there, waving at him, her deep black
eyes so prominent in the little white
face. But it was! His heart leaped
and pounded. All the old emotion, the
ecstatic rapture of the springtime,
surged back into his empty being
and filled him with remorse. How
could he ever have doubted her? Even
from here, he could look into her
shining eyes and know that she
never could have betrayed him as
Avis had said she did. His smile
leaped down to meet hers, and his
hand waved wildly. He almost
trampled over Avis in his eagerness
to reach her, oblivious of everything
else in the world. They clung to each
other desperately. Ten days had been
an eternity of separation.

"But how—" he wondered, when
he could speak.

"I arrived yesterday. I flew to New
York, and came on the fastest boat
that sails the seven seas," breath-
lessly, "but I'll tell you all about it,
later. Let me see you through the
customs, first."

"Darling, are you real?" he
squeaked in awe.

"Real enough to remember the
French I need right now."

"Then you are—you!" he admitted
with delight.

Avis was so shocked and bewildered
that all she wanted to do was
escape. Neither of those two united
forces had even remembered her ex-
istence. She hurried away to lose her-
self in the weaving throngs. "Well,
that is—that," she observed wryly to
herself. "You can stir a man's emo-
tions, but you can't make him love
you like that!"

—THE END—

What Does Your Handwriting Reveal?

The author of the fascinating series
of articles on Character Reading
from Handwriting, appearing in this
paper, will tell you your weak points
and your strong traits. And, perhaps
you have some friends whose real
character you would like to know?

Send specimens of the writing you
wish to be analysed, stating birth-
date and home address. Enclose 10¢ coin
for each specimen, and send with 3¢
stamped addressed envelope, to Law-
rence Hibbert, Grapho-Analyst, c/o

Dermott Ave., Winnipeg, Man.

Planes For Churchgoers

Going to church by airplane is a
novelty in Scotland that promises to
become very popular. Attending ser-
vices in other cities on air routes is
expected to greatly increase. Re-
cently the Moderators of the General
Assembly of the Free Church of
Scotland flew to the Orkney Islands
to attend services.

Since the Civil War, only three
United States presidents have been
Democrats.

Between 1300 and 1400 A.D. bubo-
nic plague killed one-fourth of
Europe's population.

Little Helps For This Week

"He that abideth in me and I in
him bringeth forth much fruit." John
15:5.

"Let the beauty of the Lord our
God be upon us." Psalm 90:17.

As some rare perfume in a vase
of clay
Perfumes it with a fragrance not
its own
So, when Thou dwellest in a
mortal soul,
All heaven's own sweetness
seems about it thrown.

Some glances of real beauty may
be seen in their faces who dwell in
true meekness. There is harmony
in the sound of that voice to which
Divine love gives utterance, and some
appearance of right order in their
temper and conduct whose passions
are regulated.—John Woolman.

I believe that no Divine truth can
dwell in any heart without an ex-
ternal testimony in manner, bearing,
and appearance, that must reach the
witness in the heart of the beholder
and bear an unmistakable, though
silent, evidence to the eternal prin-
ciple from which it emanates.

Link With The Past

Blacksmith, Who Is Said To Have
Helped Jesse James, Is Dead

In Ontario

George Kydd, 92, resident of Port
Arthur for many years and well
known as a blacksmith and farmer
throughout Ontario and mid-western
states, is dead. He is generally
credited with being the blacksmith
who put shoes backwards on Jesse
James' horse in order to confuse a
pursuing posse.

He was born in Jalalabad, India,
in 1842, the son of Sgt.-Major John
Kydd, of Cawnpore, and served for
a time with his father's regiment,
the 23rd Welsh Fusiliers. He was
discharged from the army in 1863,
came to the United States and lived
in Pennsylvania before moving to
Ontario.

THE RHYMING OPTIMIST

By Aline Michaelis

MEMORY'S FRAGRANCE

Sometimes I complain that I cannot
forget.
I would thrust from my mind all old
memories; yet,
What were life without laughter of
dear, vanished days
And the sunlight of love which once
brightened its ways?
All the past was not fashioned of
music and song;
There was sorrow, sometimes; there
were trouble and wrong.
Yet the haze of time has so mellow-
ed those hours
That the whole when recalled, had
the fragrance of flowers.
And that fragrance, adrift down life's
age-showered years,
Is a talisman, barring the folly of
fears,
Sometimes I have fancied forgetting
is best,
Yet the memory of dawn may still
brighten the West.

Lady Visitor—"My, my, who are
those vision looking people? What
are they in for?"

Warden—"Them's me wife and two
daughters, ma'am; we use that for
our sitting-room."

Only 25 of the 57 attempts at
crossing the Atlantic in heavier-than-
air machines were completed without
loss of life.

Fire Danger In Schools

Says Many Schools In Canada And
U.S. Are Fire Traps

Alfred Fleming, New York, super-
visor of conservation in the United
States national board of fire under-
writers, said many schools in Canada
and the United States are fire traps.
Mr. Fleming, speaking at a lunch-
on of the Canadian Fire Marshals'
Association and the Dominion Fire
Prevention Association, declared "six
and a half schools burn every day of
the year" in Canada and the United
States.

School For Churchill

The farthest north public school
building in Manitoba is being erected
in Churchill by Churchill residents.
A male teacher will be sent north by
Manitoba department of education as
soon as the building is completed.
Twelve children are already enrolled
as pupils.

Girls seem to alter from year to
year, mentions a seaside dweller.
But the men look just the same.

FALSE TEETH

Dr. WERNET'S POWDER

Dr. Wernet's Powder holds false
teeth so firmly and comfortably in
place for 24 hours—they actually feel
natural—eat, laugh, sing without fear
of any slipping. Prescribed by world's
most eminent dentists—they know it's

PARENTS AND SCHOOL

The annual progress pageant has begun, the procession of youth schoolward. There is no function of parents so important as providing for the education of their children. Upon this depends the well-being of tomorrow.

From teaching her children at her knee, the mother has turned over almost the whole responsibility to the school. Since educators are specialists in their line, it is well to give them a free hand in the management of the school; but it is well also for the parents to know the school and the teacher, to observe what is going on educationally, and to give hearty co-operation to the system.

The attitude of the child toward the school is largely a reflection of his parents' attitude toward these. If the parent is critical, disrespectful, or regards school life as of little value, the child will not get the most out of these advantages.

of the child should stress the importance of school life and give him an opportunity to concentrate on it and put his best into it. School interests should have right of way. Society life, trips, entertainment, and interfering work should be sidetracked during the school year.

The home of the school child should provide him with plenty of simple food; proper clothing; opportunity for cleanliness; adequate sleep, enough play and recreation and a few home tasks; time, place and quiet for home study and encouragement in his school life. Do not so crowd your child with his studies that he becomes rebellious; or disgusted, but provide him with a favorable background for study. He will thrive best if surrounded with companions who are keen in their school life.

School Fair

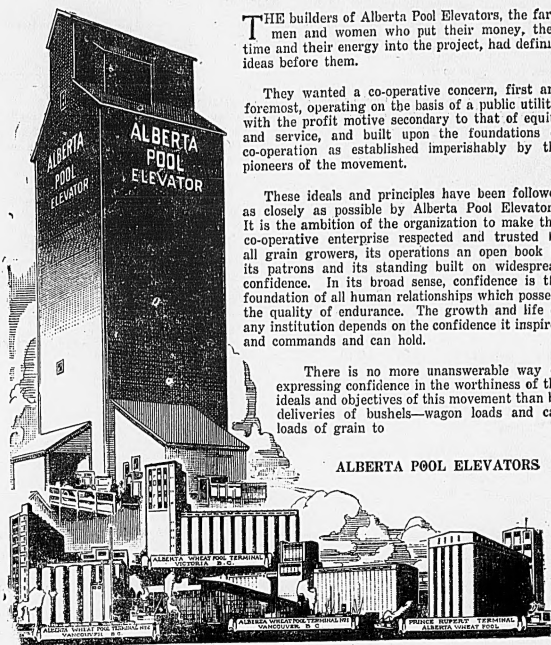

The Chinook and District School Fair was held on Tuesday Sept. 12th. The weather was fine, and the Fair was a real success. The parade started from the school marching through the town when they were judged, the following being the prize winners: 1st prize—Swan School teacher Miss Tobin 2nd prize—Chinook, teacher Miss Jensen 3rd prize—Chinook high, M. Meeres.

Following An Ideal

THE builders of Alberta Pool Elevators, the farm men and women who put their money, their time and their energy into the project, had definite ideas before them.

They wanted a co-operative concern, first and foremost, operating on the basis of a public utility, with the profit motive secondary to that of equity and service, and built upon the foundations of co-operation as established imperishably by the pioneers of the movement.

These ideals and principles have been followed as closely as possible by Alberta Pool Elevators. It is the ambition of the organization to make this co-operative enterprise respected and trusted by all grain growers, its operations an open book to its patrons and its standing built on widespread confidence. In its broad sense, confidence is the foundation of all human relationships which possess the quality of endurance. The growth and life of any institution depends on the confidence it inspires and commands and can hold.

There is no more unanswerable way of expressing confidence in the worthiness of the ideals and objectives of this movement than by deliveries of bushels—wagon loads and car loads of grain to

MILK DESSERTS

Every member of the family should use his daily quota of milk. There is nothing else like it and children need a quart each day, while at least a pint is demanded for older folk.

A wide variety of milk desserts may be made with a blanc mange or boiled custard foundation. To make blanc mange, use two cups of milk and scald all but about one fourth cup of it. Mix together three tablespoons of corn starch or six of flour, one fourth cup of sugar and a pinch of salt. Stir this to a paste with the cold milk and add the mixture to the scalded milk. Cook in a double boiler, stirring constantly, until it thickens; cover tightly and continue cooking for twenty minutes; remove from fire, add a tablespoon of vanilla and two stiffly beaten egg whites.

For boiled custard, omit the corn-starch or flour and use three eggs or six yolks. Scald two cups of milk and add to it the slightly beaten eggs, sugar and salt, as for blanc mange and cook in the double boiler until it forms a coating on the spoon. It will not be as thick as blanc mange and does not require as long cooking.

"As pure as .. BEER"

Many people may be surprised at this unexpected comparison: "As pure as .. BEER." Yet it is a simple fact that there is no article of food or drink produced with greater care and in greater purity than the beer of today.
